APPROVAL.....OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 50391 is issued subject to the terms and conditions imposed in said Permit 50391 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The issuance of this permit will allow the permittee to dewater the pit area. The water diverted from this well during the dewatering stage will be placed in such manner as to allow for percolation back to the groundwater source.

Monthly reports covering and including the rate of diversion and (CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed.....0.44.....cubic feet per second.....

Work must be prosecuted with reasonable diligence and be completed on or before.....June 19, 1988

Proof of completion of work shall be filed before.....July 19, 1988

## (PERMIT TERMS CONTINUED)

the total volume from this dewatering well shall be supplied to the State Engineer.

The permittee shall discharge water in a manner and in allocation calculated to conserve water. All disposal sites shall be first approved by the State Engineer.

After the dewatering of the pit area the water diverted will be used for mining, milling and domestic purposes.

The total diversion rate under Permits 50386, 50387, 50388, 50389, 50390, 50876, 50877, 50878, 50879, 50880, 50881, 50882, 50883, 50884, 50885, 50886, 50887, 50888, 50889, 51284, 51449, 51450, 51772, 51822, 51823, 51824, 51825 and 51826 shall not exceed 32.00 c.f.s. (14,360 gallons per minute).

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

This permit is issued under the preferred use provisions of NRS Chapter 534. The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal, and local agencies.
